Assignment 2 Group Report

Group Size: 3 **Chosen Theme:** To-Do List

Full Names: Soulaymane Alahiane; Aya Drissi; Rim Zemmouri

Student IDs: Soulaymane 158002; Aya 147970; Rim 169600

Course Codes & Sections: Soulaymane CSC 3324 03; Aya CSC 3324 03; Rim CSC 3324 01

GitHub Usernames: soulaymanealahiane; Aya-Drissi; Rimzemmouri

GitHub Repository URL: https://github.com/soulaymanealahiane/GitLab-Assignment2

GitHub Pages URL: https://soulaymanealahiane.github.io/GitLab-Assignment2/

Project & Role Distribution

Three-member path: Soulaymane added tasks; Aya implemented completion/reopening; Rim implemented filtering and menu integration. The Python application stores tasks in memory.

Branches, Commits & Contributions

Soulaymane: feature/soulaymane-add-tasks; 25b2ef5 added logic/tests/CI, 662b386 fixed trimming.
Aya: feature/aya-completion; 182f3bf added completion/reopening, 5e0b3d5 added tests.
Rim: feature/rim-filtering; 0ebc849 added filtering, 162ddae added tests, 28b1283 resolved the conflict.

Pull Requests & Code Review

PR #1: Soulaymane, reviewed by Aya. She requested an ID regression test; Soulaymane pushed 5dd392b on the same branch, then Aya re-reviewed and approved. PR #2: Aya, reviewed by Rim. PR #3: Rim, reviewed by Soulaymane. All three feature PRs merged.

Merge Conflict

Aya and Rim changed the same README status line from base 4f6d611. After Aya merged, Rim merged origin/main into her branch. Current was Rim's filtering status; Incoming was Aya's completion status. Resolution 28b1283 combined them: *Project status: Task creation, completion, and filtering are ready.* Soulaymane reviewed it.

Unit Tests

All 15 pytest cases passed locally: Soulaymane 4, Aya 6, Rim 5. Normal: task operations/filtering. Boundary: whitespace, nonconsecutive IDs and empty lists. Invalid input: blank titles, missing IDs and invalid filters.

Continuous Integration

On pushes and PRs, the Ubuntu pytest job checks out code, sets up Python 3.12, installs requirements.txt and runs pytest. Failed run 38324302205 exposed untrimmed titles. Commit 662b386 fixed storage of the trimmed value; run 38324521813 passed.

Ruleset & Protected main

The active main ruleset requires a PR, one approval and successful pytest; deletion and force pushes are blocked. No bypass actors are configured. PR #1 remained blocked with passing tests until approval.

Continuous Deployment

GitHub Pages publishes main/docs. PR #4 prepares the final feature list and menu instructions. Its approval/merge and verification of the final live update remain pending; the evidence shows a preview. The live URL is listed above and in README.md.

Contribution Summary

Soulaymane: creation/setup/CI/report; feature/soulaymane-add-tasks; authored #1/#4, reviewed #3; 4 tests.
Aya: completion/reopening; feature/aya-completion; authored #2, reviewed #1; 6 cases.
Rim: filtering/menu/conflict; feature/rim-filtering; authored #3, reviewed #2; 5 tests.

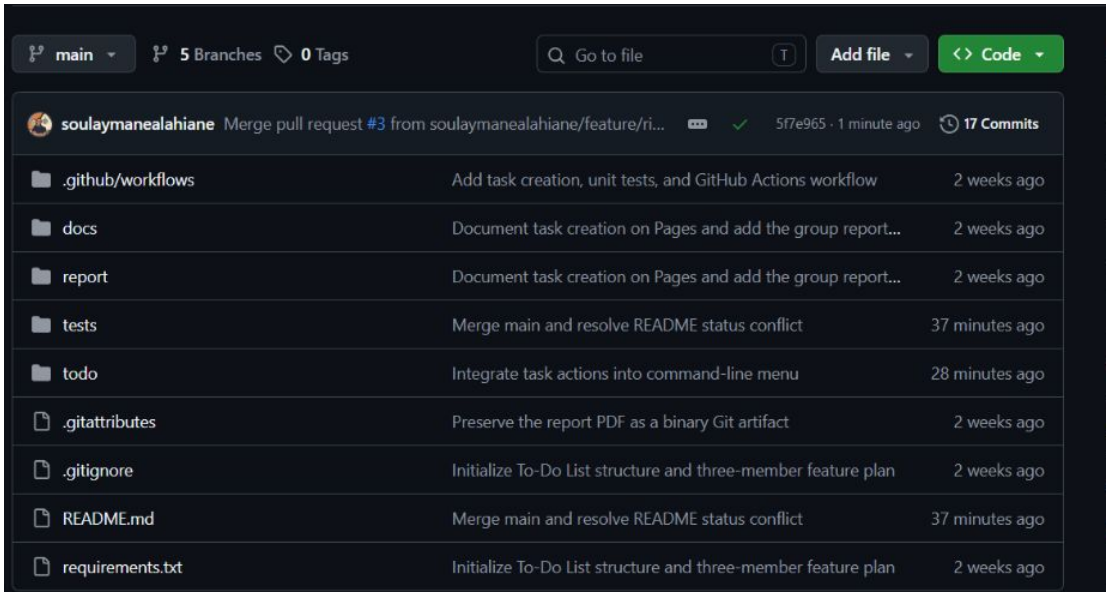

Fair Use of AI

Codex assisted with development, tests, debugging and documentation. Soulaymane, Aya and Rim each contributed their assigned feature through their own commits and reviews. The project was built from scratch, and each member remained responsible for their work.

Sources & Reflection

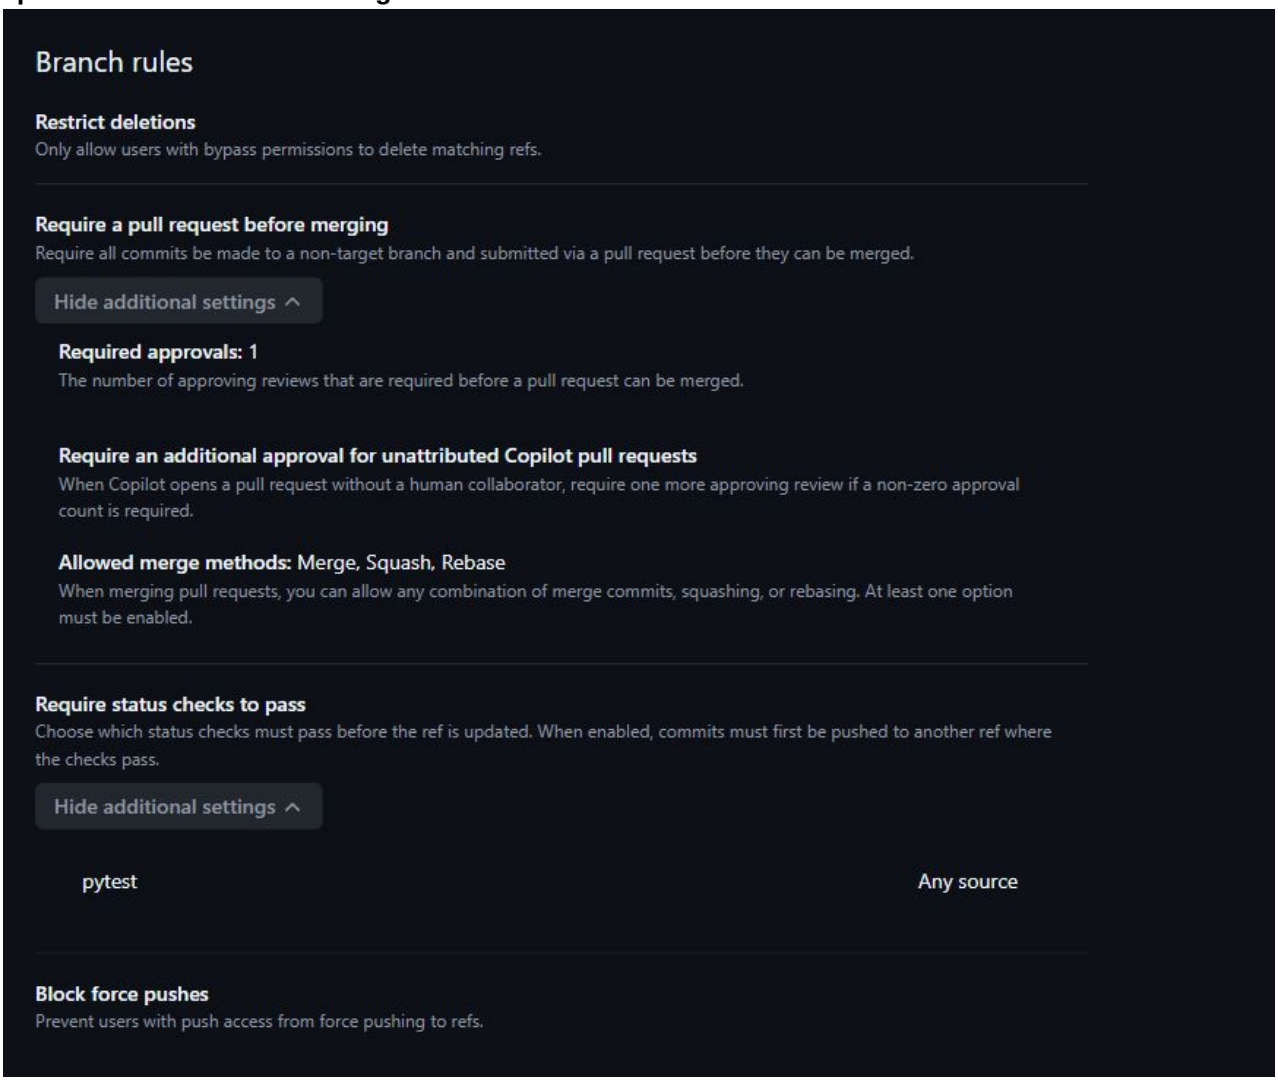

Sources: Assignment 2; pytest documentation; GitHub Actions documentation; GitHub Pages documentation.
Coordinating the README conflict was hardest. We compared Current and Incoming before combining them. For blocked PRs, check approvals and CI first. For test or workflow failures, inspect the failing step and branch state.

Repository structure

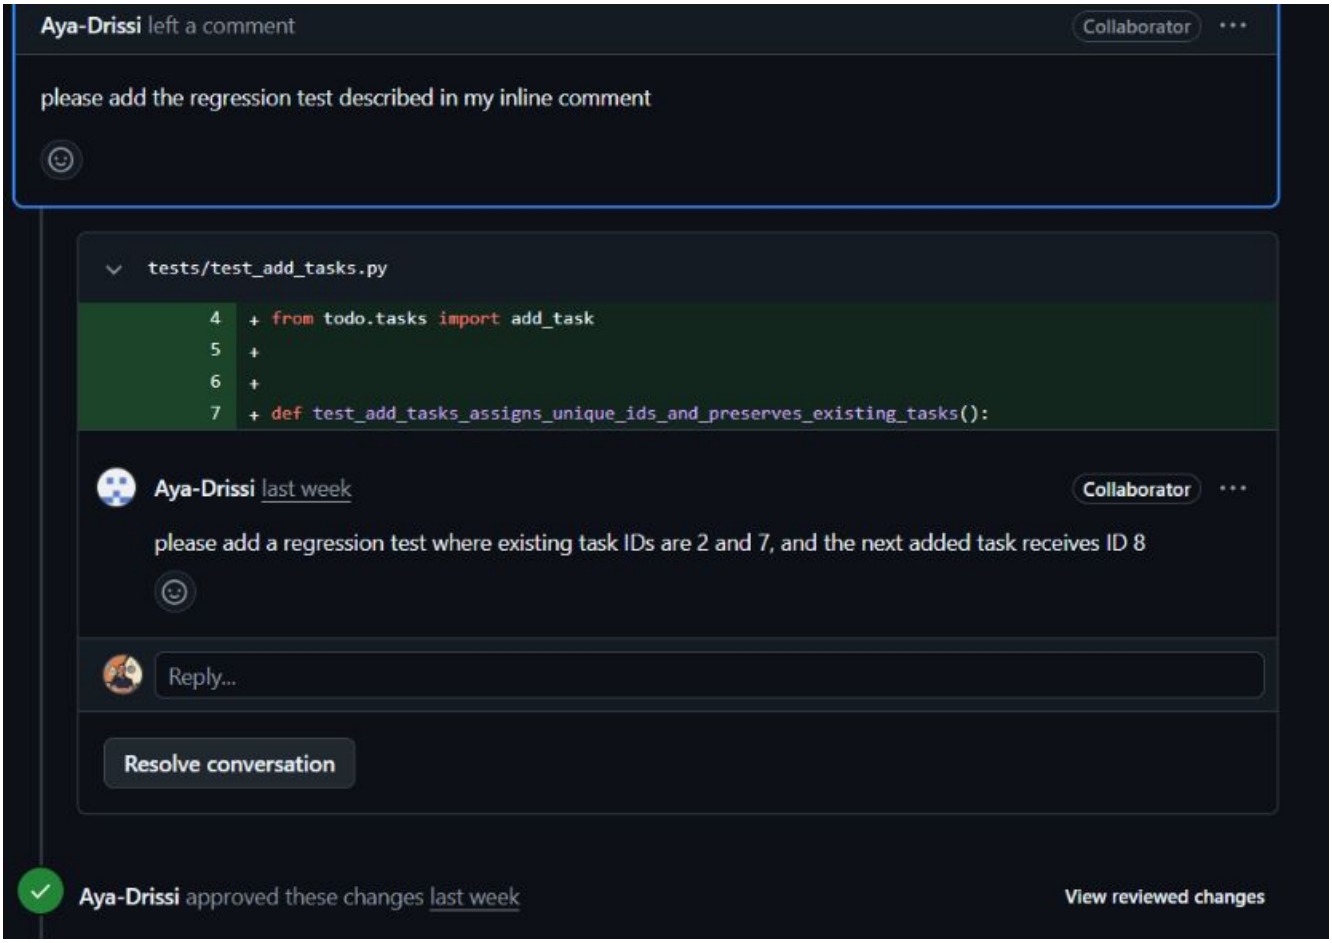

Public repository with application, tests, workflow, docs and report.

Required review and test settings

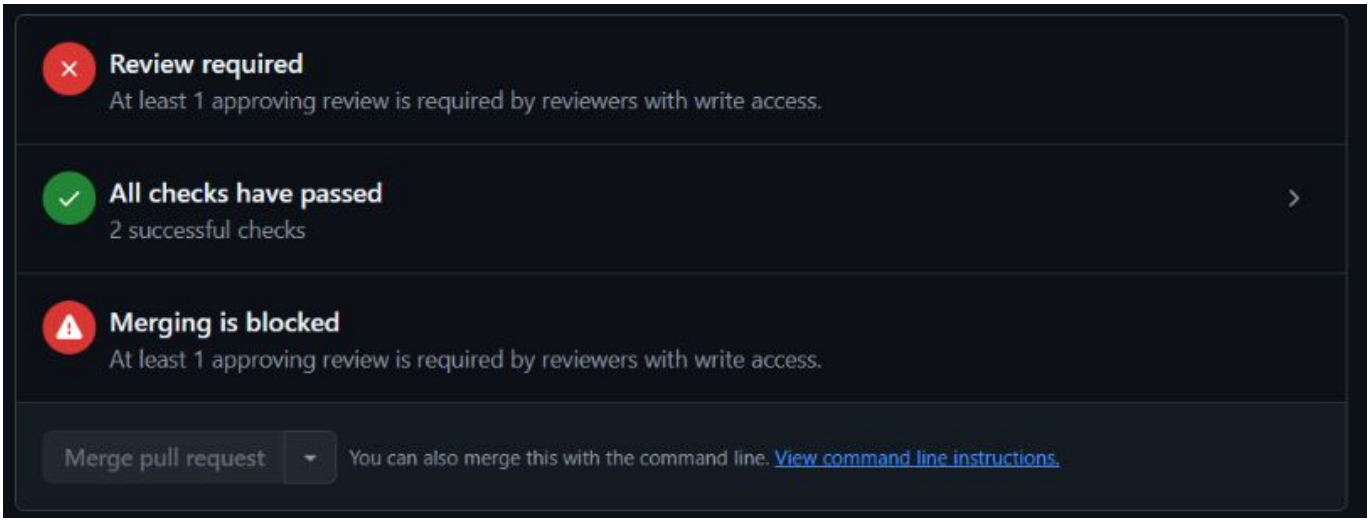

Main rules: PR, one approval, pytest, deletion restriction and blocked force pushes.

Requested change and approval

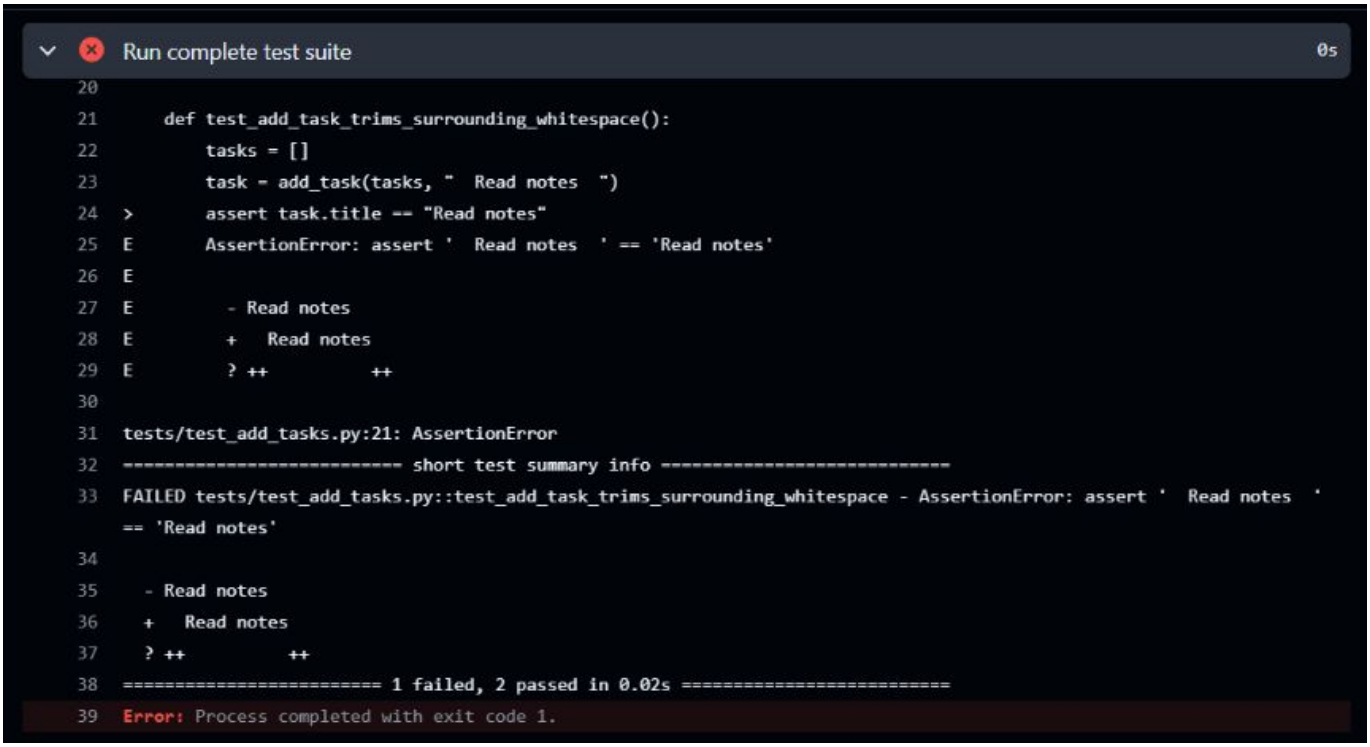

Aya requested the ID test; commit 5dd392b addressed it on the same branch before approval.

Merge blocked despite passing checks

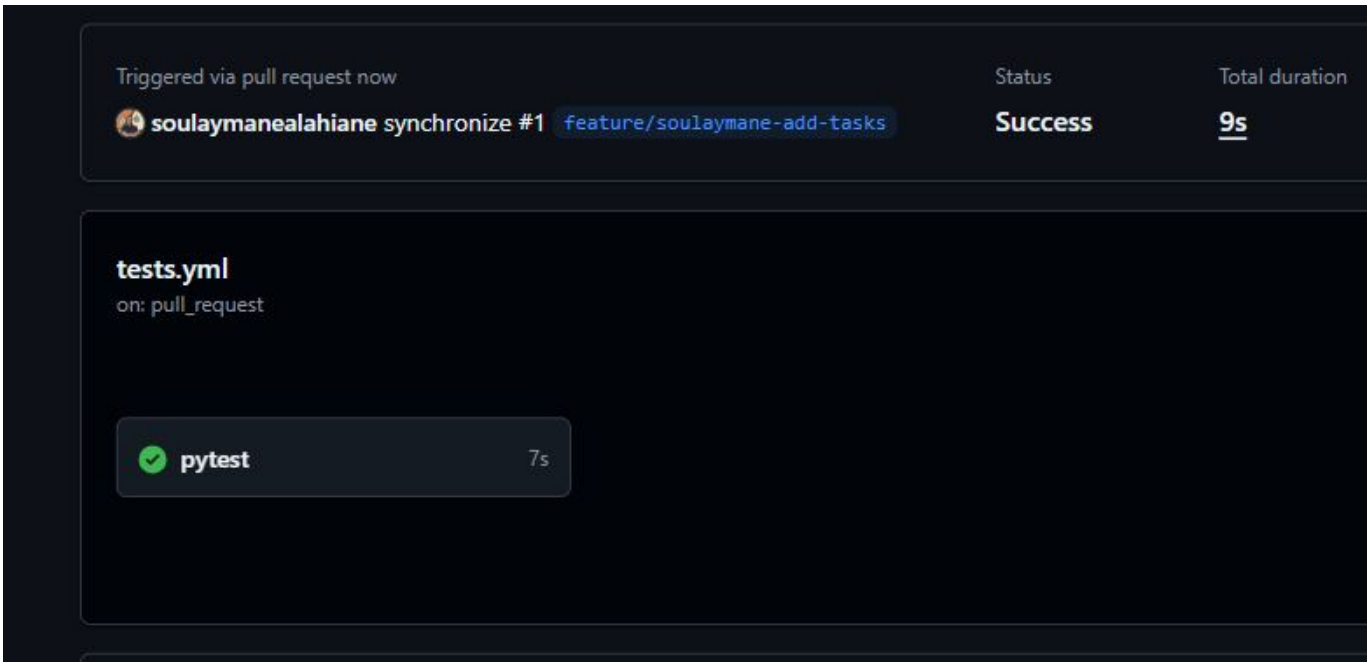

PR #1 still required an approving review.

Failed GitHub Actions run

The whitespace assertion failed: 1 failed, 2 passed.

Successful GitHub Actions run

The corrected branch passed CI.

Local tests and conflict resolution

Assignment 2 recorded Git and local test evidence

Complete local pytest suite

Actual captured output from the integrated application at commit 217f95d. Command: python -m pytest -p no:cacheprovider

README conflict and committed resolution

Actual `git show --remerge-diff 28b1283 -- README.md` output. Git reconstructs the conflicted merge from the recorded parents and compares it with Rim's committed resolution. This is a history verification view, not an original screenshot taken during the merge.

```
diff --git a/README.md b/README.md
remerge CONFLICT (content): Merge conflict in README.md
index c3115d7..2b0944a 100644

 A simple Python To-Do List built from scratch for Assignment 2.

-<<<<<<< 563c914 (Update project status for filtering feature)
-Project status: Task filtering and the command-line menu are ready.
-=======
-Project status: Task creation and completion are ready.
->>>>>>> 939285b (Merge pull request #2 from soulaymanealahiane/feature/aya-completion)
+Project status: Task creation, completion, and filtering are ready.

 ## Team and feature plan
```

Captured local results and Git remerge-diff for 28b1283. The conflict is reconstructed from Git history, not a merge-time screenshot.

Project page update preview

To-Do List

Assignment 2 group project. Theme: To-Do List.

Team and assigned features

- Soulaymane Alahiane: add tasks with validated titles and unique IDs.
- Aya Drissi: complete and reopen tasks.
- Rim Zemmouri: filter tasks and integrate the command-line menu.

Implemented features

All three team features are integrated.

- Add tasks with unique IDs and validated, trimmed titles.
- Complete tasks and reopen them as pending.
- List all tasks, pending tasks, or completed tasks.

PR #4 preview. Publication and live verification await its approved merge.
